EXPERIENCE

08/2023 - Present

Jenin

Network Administrator & HMS Manger

Alrazi Hospital

- Provided extensive technical support and oversaw the management of hospital systems, networks, and servers developed and deployed automation tools using Python, Bash scripting, and PowerShell that reduced manual workloads by 30% and cut system check and backup times by 40% enhanced network monitoring accuracy by 25%, contributing to a 20% reduction in IT-related incidents performed regular security assessments and penetration tests, identifying and resolving critical vulnerabilities, reducing potential security risks by 50% played a key role in advancing the hospital's technological infrastructure and strengthening its cybersecurity measures

02/2022 - 06/2022

Home

Full-Stack Developer

Freelancer

- In 2022, partnered with a colleague to develop a highly secure website for transmitting texts and files, focusing on data protection and encryption responsible for backend development using JavaScript, with MySQL handling the database operations crafted the frontend using HTML, CSS, and JavaScript, ensuring a responsive and user-friendly interface implemented Blowfish encryption for data transmission, alongside advanced hashing techniques to guarantee robust security reinforced skills in full-stack development and deepened expertise in cybersecurity and secure web development practices

10/2018 - 02/2019

Nablus

Full-Stack Developer

Al-diwan

- Spearheaded the development of an integrated data archiving website at Al-Diwan Company, leading every stage from initial design to deployment responsible for backend development using PHP Laravel, optimizing a MySQL database and boosting query performance by approximately 30% crafted a responsive user interface on the frontend using HTML, CSS, JavaScript, and jQuery, increasing user engagement by 15% due to seamless cross-device compatibility conducted rigorous security assessments, successfully identifying and mitigating 95% of potential vulnerabilities, resulting in zero data breaches throughout the project sharpened skills in secure web development and enhanced capability to manage complex projects from start to finish

EDUCATION

06/2015 - 06/2017

Jenin

High School

High School

- Computer science

02/2018 - 02/2023

Jenin

Bachelor's

Aaup

- Network and Information security

SUMMARY

SENIOR TECHNOLOGY SPECIALIST Dynamic professional with expertise in computer science, network security, and hospital management systems, holding degrees from Sela Al-Dhahr Industrial School and the Arab American University. With extensive experience in Python programming, web development, and penetration testing, I excel in optimizing healthcare operations and safeguarding sensitive data. Proficient in managing Windows Server and Linux systems, I ensure secure, efficient, and seamless integration of technology. Committed to continuous learning, I leverage strategic planning and problem-solving skills to drive positive change in dynamic environments.
