PROFILE

Dynamic professional with a multidisciplinary background encompassing computer science, network and information security, hospital management systems, system engineering, and Python programming. Holding a degree in Computer Science from Sela Al-Dhahr Industrial School and a degree in Network and Information Security from the Arab American University, I bring a wealth of knowledge and expertise to the table. My experience spans freelance web development, penetration testing, system engineering, and the implementation of hospital management systems.

Skilled in Python programming, I develop tailored solutions that enhance operational efficiency in healthcare settings and address real-world challenges. My proven ability in strategic planning, implementation, and support ensures the seamless integration of hospital management systems. With a strong understanding of cybersecurity principles, I excel in safeguarding sensitive data.

In addition to my technical expertise, I have extensive experience managing both Windows Server and Linux systems. I am proficient in user and resource management techniques, ensuring optimal performance and security across various platforms.

I am committed to leveraging technology for positive change, delivering results through collaboration and problem-solving. Driven by a passion for continuous growth and a thirst for knowledge, I actively seek opportunities for learning and development, always striving to adapt in an ever-changing landscape. In the face of adversity, I remain steadfast and resilient, drawing upon my inner strength to overcome obstacles and emerge stronger.

WORK EXPERIENCE

Full-Stack Developer

Al-diwan l Nablus   2018 - 2019

At Al-Diwan Company, I was entrusted with the end-to-end development of an integrated archive website that Data archiving. My responsibilities included design, programming, database preparation, and assessing potential security vulnerabilities

Full-Stack Developer

Freelancer   2022 - 2022

In 2022, I collaborated with a friend to develop a highly secure website for transmitting texts and files. We employed multiple encryption and hashing techniques, in addition to various algorithms, to ensure the platform's safety. You are welcome to visit the website and explore its capabilities.
